RENDI RIPALDI

+62 895-0784-9461 | rendiripaldi225@gmail.com | https://www.linkedin.com/in/rendi-ripaldi
Bandung, West Java, Indonesia

Fresh graduate in Informatics Engineering (D3) with a strong foundation in database management, version control, and digital workflow automation. Experienced in implementing structured data recording and tracking systems, maintaining accuracy and traceability of information, and supporting smooth project execution through internship and independent project experience. Demonstrates strong attention to detail, administrative discipline, and cross-team collaboration skills. Possesses solid analytical ability, adaptability to new systems and technologies, and a continuous learning mindset in supporting data management and project documentation.

Work Experience

PT Sapta Muda Berkarya (Stara Digital Partner) - **Indonesia** March 2026 - May 2026
Backend Developer Intern - Client Project: Amanda Mart B2B Portal

PT Sapta Muda Berkarya (Stara Digital Partner) is an Information Technology Services, IT Consulting, and Software House company that acts as a digital partner for businesses and organizations building digital systems. During the internship, was placed alongside a mentor on the Amanda Mart client project, working on B2B portal development on the backend side.

- Developed and deployed a B2B portal for client Amanda Mart using Laravel and PostgreSQL, including designing the data schema to be well-organized and easily traceable.
- Implemented Two-Factor Authentication (2FA) to maintain the security and integrity of client data access.
- Designed and optimized the database schema to keep data consistent, accurate, and easily auditable.
- Ensured system security and data scalability throughout the portal development cycle, under the guidance of an internship mentor.

Education

Universitas Logistik dan Bisnis Internasional - **Bandung, Indonesia** 2023 - 2026
Diploma (D3) in Informatics Engineering, GPA 3.6/4.00

- Relevant coursework: Databases, Web Programming, Computer Networks, System Security.
- Actively involved in collaborative application development projects and group coding activities.

SMA Negeri 2 Garut - **Garut, Indonesia** 2020 - 2023
Social Sciences (IPS) Major

- Relevant subjects: Economics, Sociology, Geography, History.
- Actively involved in school organizations and extracurricular activities.

Project Experience

The following projects were completed as part of the final-year curriculum for the D3 Informatics Engineering program.

Point-Based Waste Bank Web System - **Academic Project, Collaborative - Indonesia** Sep 2024 - Feb 2025
Backend Developer

A web-based waste bank management system for recording members, transactions, and reports digitally, completed as a group project with the role of Backend Developer.

- Built CRUD modules for managing members, transactions, and reports using PHP, Laravel, and Filament, reflecting a systematic data recording and verification workflow.
- Integrated a real-time admin dashboard to monitor and manage data status centrally.
- Managed the MySQL database and application deployment on a local server.

Gudang Pro - Warehouse Management System - **Academic Project, Collaborative - Indonesia** Jun 2025 - Aug 2025
Backend Developer

A web and mobile-based warehouse management application for real-time stock data synchronization, completed as a group project with the role of Backend Developer.

- Built a REST API using Node.js to support data synchronization between the web and mobile applications, ensuring one consistent data source across all access points.
- Designed backend logic for stock tracking, incoming/outgoing goods reports, and real-time notification features.
- Managed data structure and API communication to keep the companion web and mobile apps synchronized.

My Daily Kos - Boarding House Finance App - **Academic Project, Individual - Indonesia** Sep 2025 - Feb 2026
Fullstack Developer

A mobile application for daily financial management for boarding house residents with automated OCR-based recording, developed individually covering the entire development cycle (fullstack).

- Integrated Firebase (Firestore, Auth, Storage) for structured and secure real-time data management.
- Built automated receipt scanning and recording using OCR with n8n automation.
- Designed a financial data flow with charts and monthly expense summaries.

T.U.R.U App - **Academic Project, Individual - Indonesia** May 2026 - Aug 2026
Fullstack Developer (Frontend & Backend)

A mobile application for screening and early detection of health risks caused by poor sleep patterns (aimed at university students), which predicts 6 classes of health risk and provides interactive education through an AI chatbot. Designed and developed individually, covering both the Frontend and Backend.

- Developed the mobile application using Flutter (Dart) to record users' daily sleep activity and display risk prediction results through an interactive dashboard.
- Built a REST API using Node.js, TypeScript, and Express.js, including the logic to aggregate weekly data into metrics for average sleep duration, schedule variability, and accumulated sleep debt.
- Designed the database schema using PostgreSQL and Prisma ORM to store user data and prediction history in a structured manner.
- Integrated the backend with a Python-based Machine Learning microservice (K-Nearest Neighbor algorithm) for disease risk classification, as well as with the Google Gemini API as an AI chatbot (Hypnos AI) to deliver results as easy-to-understand health education.
- Implemented a feature to download prediction results as a PDF report using PDFKit.

Skills, Achievements & Other

- **Soft Skills:** Detail-Oriented, Structured, Administrative Discipline, Problem Solving, Team Collaboration, Fast Learner
- **Hard Skills:** Database Management (MySQL, PostgreSQL, Firebase Firestore, Prisma ORM), Workflow Automation (n8n), Version Control (Git/GitHub), REST API & GraphQL, MS Office
- **Certifications:** SAP01 - SAP Overview, SAP University Partnership Program (PT Harfan Tri Megah) - January 2024
- BC400 - Introduction to the ABAP Workbench, SAP University Partnership Program (PT Harfan Tri Megah) - July 21, 2025
- **Languages:** Indonesian (Native), English (Intermediate - technical documentation reading)
